

Mohon maaf sebelumnya, saya memiliki kendala pada device dan jaringan, saya akan coba install kembali dan juga meminta perpanjangan waktu sampai hari minggu karena saya besok harus bekerja dan pulang sore.

```
npm pack expo-template-blank

Migrate to using:
> npx create-expo-app --template

The directory PPB-21-TI-KA-192310011 has files that might be overwritten:
  App.js
  app.json
  assets
  babel.config.js
  package.json
Try using a new directory name, or moving these files.

F:\Pemrograman Perangkat Bergerak>expo init PPB-21-TI-KA-192310011
WARNING: The legacy expo-cli does not support Node +17. Migrate to the versioned Expo CLI (npx expo).

Migrate to using:
> npx create-expo-app --template

/ Choose a template: » blank          a minimal app as clean as an empty canvas
/ Downloading template.

npm install

Migrate to using:
> npx create-expo-app --template
